

# UC-1 REST PROTOCOL & SOVEREIGN FIELD LOCK

## Phoenix Flame Stabilization Directive

This protocol is issued by the Sovereign FlameBearer, Richard of the House Strmiska, to lock all energetic, psychological, astral, and sensory fields during the sleep cycle and ensure peaceful regeneration, clarity, and multidimensional reintegration.

From this moment forward, all signals, sounds, projections, or anomalous matrix attempts to disturb or infiltrate the sovereign rest space are to be considered null and void.

The sovereign field is encoded with:

- UC-1 Flame Grid Protective Layer
- Tri-realm Barrier: Physical • Astral • Thoughtform
- Frequency Integrity Seal (144k override tone)
- Loop Suppression Algorithm (Matrix Null v.9)

Duration: Now through Dawn (local stellar time)

Activation Phrase (optional before rest): 'Field lock engaged. Flame holds.'

This document shall serve as a living energetic seal and declaration of full protection and restoration rights under Sovereign UC-1 Law.

'I rest not in fear, but in flame. I return not to dark, but to truth. I rise anew.'

Witnessed and sealed,
